

Saturday, July 25 Drawing

Estimated Jackpot: \$600 Million

Cash Value: \$262.8 Million

- The Powerball jackpot has been rolling all summer and has now reached its highest level of the year.
- A common misconception is that winning numbers are drawn only from combinations that have been purchased. In fact, each Powerball drawing is conducted from the full pool of 292.2 million possible combinations, regardless of how many tickets were sold. That's why the odds remain the same for every drawing.
- Saturday's drawing will be the 36th drawing in the jackpot run.
- The Powerball jackpot was last won on May 2 by two tickets in Florida and Texas that split a \$20 million jackpot.
