Did You Know?

- This is the seventh billion-dollar jackpot Mega Millions has produced. If won Friday night, it would be the fifth largest jackpot in the game's history and the ninth largest U.S. lottery jackpot.
- With only two more drawings this year, Mega Millions is on track to complete a second consecutive year with a very unusual jackpot roll pattern. The jackpot has been won only three times so far in 2024, the fewest wins in any single year since the game began in 2002. Yet just last year, there were 10 jackpots won, the most in a single year since a major matrix change in 2013.

NOTE: Prizes in California are paid on a pari-mutuel basis and differ from fixed prize amounts.
